The value of your investment and the income from it can go down as well as up, it may be affected by exchange rate variations, and you may not get back the amount invested. Past performance is no indication of current or future performance. Please ensure you read the Prospectus (including the Singapore Addendum) for this Fund before making an investment decision. These documents contain important information including risk factors, details of charges and selling restrictions.

**Note:** The fund can invest a significant portion of the portfolio in high yield and non-rated bonds. These bonds may offer a higher income but carry a greater risk of default, particularly in volatile markets. The fund uses derivatives, which may increase volatility; the fund's performance is unlikely to track the performance of broader markets. Losses on short positions may be unlimited. Counterparty risk may cause losses to the fund. In difficult market conditions, it may be harder for the manager to sell assets at the quoted price, which could have a negative impact on performance. In extreme market conditions, the Fund's ability to meet redemption requests on demand may be affected. The fund may also invest in emerging markets which carry increased volatility and liquidity risks. Income payments will fluctuate. All of the fund's expenses are charged to capital, which can reduce the potential for capital growth. This fund can invest more than 35% of its value in securities issued or guaranteed by an EEA state.
